Re: Veterinary Medical/Dental Application of Dremel® Rotary Tools

Dear Dr. Burnell,

The S-B Power Tool Company does not endorse its Dremel® Rotary Tool for any medical, dental or veterinarian applications. Dremel® rotary tools as they are presently designed and manufactured are not intended to be used as medical/dental devices. Double insulated tools are not intended to be used in a wet or damp environment and the use of the tool in this kind of an application may lead to an electric shock hazard. In that regard we add a warning statement to all manuals regarding misuse in this manner:

**This product is not intended for use as a dental drill, in human or veterinary medical applications. Serious injury may result.**

We have not and do not intend to obtain FDA (USA Federal Food and Drug Administration) approval for this type of product. As such being the case, we also do not have or recommend protocols regarding sterilization and use of our rotary tools in medical applications. If you have any further questions or concerns please do not hesitate to contact me at 773-794-7513.

Sincerely,

Jennifer Uzumcu  
Associate Safety Engineer
